PM's Speech at at distribution of about 70000 appointment letters to newly inducted recruits under Rozgar mela

Namaskar!
These national level 'Rozgar Melas' or job fairs have become the new identity of the NDA and BJP government. Today once again more than 70 thousand youngsters have received appointment letters. I am glad that the BJP-ruled state governments are also organizing such Rozgar Melas in all the BJP-ruled states from time to time. This is a very crucial time for those who are getting government jobs these days.

The period of 'Azaadi Ka Amritkaal' has just begun. You have the target of making India a developed nation in the next 25 years. You have to work hard not only for the present but also towards the brighter future of the country. I congratulate and convey my best wishes to all the youngsters and their families who have received the appointment letters today.

Friends, Today, new job opportunities are constantly being created in both private and public sectors in India. A large number of our youngsters are also looking into self-employment

prospects. Mudra Yojana, which provides financial assistance without bank guarantee, has helped crores of youngsters. Campaigns like Start Up India, Stand Up India have further enhanced the potential of the youth. These youngsters, who received assistance from the government, are now themselves providing jobs to many youngsters.

The way the youth have been given government jobs on a large scale in the past years under this campaign, is also unprecedented. Major government-job-providing

Today the whole world is ready to walk with us in our journey towards development. Never before has there been such trust in India and such belief in our economy.

organizations like SSC, UPSC and RRB in the country have given jobs to a greater number of youths through these arrangements than ever before. And this has also been mentioned in the video which was shown a short while back.

The emphasis of these institutions has also been on making the examination process transparent, systematic and simple. Earlier, the entire cycle to complete the recruitment process through examinations used to take a year or 1.5 years to complete and if there was a court case, then two or even five years would be wasted

in the process. But now the whole cycle and all the processes are being completed in a transparent manner just within a few months.

Friends, Today the whole world is ready to walk with us in our journey towards development. Never before has there been such trust in India and such belief in our economy. You are already aware that, on the one hand there is a global recession and a severe pandemic like Corona all over the world, and on the other hand the global supply chain is breaking down due to war. So many challenges are visible all over the world. And my young friends, you should pay attention to this - despite all these problems, India is taking its economy to a new height.

Today, the world's top companies are coming to India for manufacturing. Today India's foreign exchange reserves are at a record level. When such a large amount of foreign investment flows in, production increases, industries expand, new industries are established, exports rise, and naturally this work cannot be done without new youngsters. And that's why employment opportunities grow very fast.

Just a short while ago, Dr. Jitendra Singh ji was giving a detailed description line by line about how the decisions of our government have created lakhs of new opportunities in the private sector. But I want to put forth an example before you of the automobile sector. The contribution of this sector in the country's GDP is more than 6.5%. In the last few years, the automotive industry of India has taken a major leap.

Today, the export of passenger vehicles, commercial vehicles from India to many countries of the world is increasing. Moreover, the export of

our Three-Wheelers-Two-Wheelers is also increasing significantly. 10 years ago, this industry was around Rs 5 lakh crore. Today this industry has made a jump from 5 lakh crores to more than 12 lakh crores. Electric Mobility is also continuously expanding in India. The automobile sector is also getting a strong boost with the PLI scheme of the Government of India. Moving forward at a faster pace, such sectors are creating new employment opportunities for lakhs of youngsters.

Friends, India today is a more stable, more secure and a stronger country than it was a decade ago. Political corruption, disturbances in schemes, misuse of public money had become the identity of all the previous governments. Today India is known for its political stability. Political stability matters a lot in the world.

Today the Government of India is identified with its bold decisions; a decisive government. Today the Government of India is being recognized for its economic and progressive social reforms. Global agencies are constantly declaring and predicting and saying with confidence that whether it is construction of highways or railways, or the matter of Ease of Living or Ease of Doing Business, India has been performing far better than the previous governments.

Over the years, India has invested lakhs of crores of rupees in its physical infrastructure and social infrastructure. This investment of lakhs of crores of rupees has also created crores of employment opportunities. Now let me give an example of social infrastructure, which is a subject related to our social life, and that is water. For water, we have started the Jal Jeevan Mission. About Rs 4 lakh crore are allocated towards the Jal Jeevan Mission.

When this mission was launched, out of every 100 households in the rural areas only 15 households had piped water supply. This is an average figure. Out of 100 houses, 15 houses used to get piped water. Today, due to the Jal Jeevan Mission, piped water supply is available for sixty-two (62) households out of every 100 and the work is still going on at a fast pace. Today, there are 130 districts of the country where tap water is available in every village and every house, and it is not a small area.

And friends, People's time has also been saved as clean potable water is now reaching them. More importantly, they are protected from serious diseases now. Potable drinking water is like a great medicine to ensure good health. A study revealed that when piped water started reaching every household, 4 lakh deaths due to diarrhoea could be avoided or 4 lakh lives were saved. That is, the Jal Jeevan Mission saved the lives of 4 lakh people.

This study also said that more than Rs 8 lakh crore could be saved by the poor of the country after clean potable water reached every house. That is, the money of the poor and the middle-class families is being saved. Earlier they had to spend this money for arranging water and for the treatment of water-borne diseases. Another major benefit of Jal Jeevan is that it will save a lot of time for women.

All of you who got jobs in this 'Rozgar Mela' can understand that there is a huge multiplier effect of each and every scheme formulated by the government. I have placed before you the example of the Jal-Jeevan Mission. In the same way, now that you have entered the government system, you will work hard to achieve every target of your department and

make every government scheme a success at a rapid pace. This is my belief in you as well as my expectation from you.

Friends, This employment campaign going on in the country is a proof of both transparency and good governance. We all have seen how dynastic political parties in our country promoted nepotism in every system. Speaking of government jobs, these dynastic parties used to promote nepotism, favouritism and corruption. These dynastic parties have betrayed crores of youth of the country.

After the formation of our government in 2014, there has been transparency in recruitment examinations and nepotism is also coming to an end. Lakhs of youngsters have benefitted from the abolition of interviews in the recruitment to Group C and Group D posts in the central government. On the one hand there are sincere efforts of our government while on the other hand there is nepotism. I want my youth to understand this completely because some things are coming to the surface on the basis of facts.

You must have seen the media reports one or two days back; a lot was seen in the newspapers and on TV. In one of the states the scam related to 'Cash for Jobs' has raised a lot of concerns for the youth of my country. So, what exactly is the system in that state? There are 'rate cards' for every post in the government job sector. For example, when you go to a hotel for food, there is a rate card, similarly there is a 'rate card' for every job post. And the poor are being looted with this system. And how is it? If you want a sweeper job, then you will have to pay this particular rate as a bribe for getting that job. If you want a driver's job then this rate will be applicable to get the driver's job; if you want a clerk's job, or a teacher's

job, or a nurse's job then there are specific rates applicable to you. Just imagine! The 'Rate Card' is being used in that state for every post and the cut money is prevalent there. Where will the youth of the country go? These selfish political parties make 'rate cards' for Jobs.

Now a few days ago, another case came to light. A railway minister had got the lands of poor farmers written off in lieu of giving them jobs i.e. 'Land for job system'. That case is also being investigated by the CBI. It is going on in the court.

Brothers and sisters, You have two things in front of you - on the one hand, there are parties that are dynastic, those parties that promote nepotism, loot the youth of the country in the name of giving jobs through corruption, the parties that have job rate cards and rate cards for everything and take cut money; while on the other hand, we are working to safeguard the bright future of the youth. Rate cards shatter your ability, your potential and your dreams. We are committed to safeguard you and to live for your dreams. We work to fulfil your resolutions. We are committed to safeguarding your every wish, aspiration, and aspirations of your families. Now the country will decide whether the future of the youth of the country will depend on the rate cards or will it flourish safely under the safeguard system. Friends, On one hand these dynastic parties snatch away the opportunities of growth and progress from the common man of the country; while on the other hand, we are creating new opportunities daily for the common man of the country.

Friends, Some political parties in our country have made language a weapon to make people fight against each other and to break the country,

You have two things in front of you - on the one hand, there are parties that are dynastic, those parties that promote nepotism, loot the youth of the country in the name of giving jobs through corruption, the parties that have job rate cards and rate cards for everything and take cut money; while on the other hand, we are working to safeguard the bright future of the youth.

but we are making language a medium to give employment to people and empower them. Our government is making sure that if someone wants

the expectations of the people and the needs of the regions. Our priority is to ensure that various government offices and departments are working

online portal called iGoT. Recently, its user base has crossed the 10-lakh mark.

to fulfil his dream, then no language should become a hurdle for him. The Government of India is laying emphasis on using mother tongue for the recruitment tests and the entrance exams. So, the sons and daughters of my country and our youth are reaping the maximum benefit out of it. By conducting the examination in the regional language, the youth have got an opportunity to prove their mettle easily.

Friends, In today's India which is rapidly making strides, the government systems and the way government employees work is also changing rapidly. There was a time when the ordinary citizens of the country had to visit government offices time and again to avail services. Today, the government is taking all its services to the doorstep of the citizens of the country. Now our government is working relentlessly by understanding

while being sensitive towards the public.

Getting access to government services and facilities has become very easy now through several mobile apps and digital services. The Public Grievance System is also being continuously strengthened. Amidst these changes, you too have to work with full sensitivity towards the citizens of the country. You have to take these reforms further. And besides this, always try to maintain the tendency to continuously learn something new.

Entry into the government services cannot be the end of your life's ambitions. You have to go beyond this and achieve new heights. New dreams, new resolutions, new potential should emerge in your lives. And for this, the government has created a new facility through the

Take full advantage of the courses available on this online portal. It will be very useful for your job. New avenues will open up for you to make further progress. And friends, I want to see you beyond this place. If you move forward, the country also moves forward. These 25 years are meant for your progress and also for the progress of the country.

Come, In the journey of the next 25 years of Amritkaal, let us walk shoulder to shoulder together and move forward at a fast pace in the direction of realizing the vision of a developed India. I once again congratulate you and your families.

Thank you very much!

Salient points of the speech of BJP National President Shri Jagat Prakash Nadda while releasing the book 'Amritkal Ki Or'

आ दरणीय प्रधानमंत्री श्री नरेन्द्र मोदी जी ने देश को पॉलिसी पैरालिसिस से बाहर निकाला, देश में वोट बैंक पॉलिटिक्स की जगह रिपोर्ट कार्ड की संस्कृति प्रतिष्ठित की। देश डायनेस्टिक

पॉलिटिक्स से निकलकर डेमोक्रेसी पॉलिटिक्स पर आई। अब देश में रिटोरियस पॉलिटिक्स करना सीख चुका है। एक समय देश में डिवीजन की पॉलिटिक्स थी - नार्थ साउथ डिवीजन, लैंग्वेज डिवीजन, आपस में वैमनस्यता के बीज बोये जा रहे थे लेकिन प्रधानमंत्री मोदी जी ने सभी डिवीजन को खत्म कर देश को एकता के सूत्र में पिरोया। प्रधानमंत्री से प्रधान सेवक का भाव - ये केवल शब्द नहीं हैं बल्कि देश का नेतृत्व करने वाले व्यक्तित्व का समर्पण भाव है।

यह संस्कारों को परिवर्तित करने वाला रास्ता है। हम तो राजपथ सुनने के आदी हो चुके थे लेकिन हमारे प्रधान सेवक ने राजपथ को कर्तव्य पथ में बदल दिया। किसी ने हमारी विरासत के प्रतिक न्याय डंड सेंगोल को वॉकिंग स्टिक बना दिया लेकिन हमारे प्रधानमंत्री जी ने उसे ढूँढ़ कर संसद में पूरे विधि विधान के साथ प्रतिष्ठित किया जो बताता है कि यह राष्ट्रीय एकता, सेवा, न्याय, संविधान के प्रति समर्पण और सेवाभाव का प्रतीक है। 2004 से 2014 के कालखंड में नेता, नीति, नेतृत्व, नीयत - सब पर प्रश्रवाचक चिह्न लगे हुए थे। 2014 में आदरणीय श्री नरेन्द्र मोदी जी की सरकार आने के बाद देश को निर्णायक नेतृत्व भी मिला, विकास के प्रति समर्पित नीति भी मिली, सही नीयत भी मिली। आज भारत दुनिया की पांचवीं सबसे बड़ी आर्थिक महाशक्ति है। वह दिन दूर नहीं जब भारत दुनिया की तीसरी सबसे बड़ी आर्थिक महाशक्ति होगी। कोरोना के कारण सप्लाई चेन प्रभावित होने और रूस-यूक्रेन युद्ध से उपजे आर्थिक संकट के बावजूद भारत की आर्थिक विकास दर दुनिया में सबसे अधिक है। आज भारत की जीडीपी का अनुमान 7.2 प्रतिशत है। आप इन्फ्लेशन के आंकड़े उठा कर ही देख लीजिये, भारत की स्थिति दुनिया के कई बड़े देशों से बेहतर है।

दुनिया कह रही है कि इंडिया इज ब्राइट स्पॉट लेकिन कांग्रेस वालों को कैसे बताएं। हम उनकी आँखें तो सही कर सकते हैं लेकिन विजन कैसे दें? भारत दुनिया में मोबाइल मैन्युफैक्चरिंग में दूसरे स्थान पर, स्टील उत्पादन में चौथे स्थान पर, ऑटोमोबाइल सेक्टर में तीसरे स्थान पर है। टॉयज प्रोडक्शन में तीन गुना वृद्धि हुई है। हाल ही में प्रधानमंत्री जी जी-7 की बैठक में जापान गए। वहां पर अमेरिका के राष्ट्रपति जो बाईडेन ने प्रधानमंत्री श्री नरेन्द्र मोदी जी से ऑटोग्राफ माँगा। साथ ही, यह भी कहा कि कैसे लोग प्रधानमंत्री श्री नरेन्द्र मोदी के सम्मान में होने वाले डिनर में शामिल होने के लिए पैरवी लगा रहे हैं। हमारे प्रधानमंत्री को पापुआ न्यू गिनी के राष्ट्राध्यक्ष कैसे स्वागत करते हैं, यह सबने देखा। ऑस्ट्रेलिया के प्रधानमंत्री कहते हैं कि मोदी जी इज द बॉस। यह बदलते भारत की कहानी है। भारत की यह तस्वीर ऐसे ही नहीं बदली है। आदरणीय प्रधानमंत्री जी ने विश्व पटल पर भारत को स्थापित किया है। भारत अमृतकाल में प्रधानमंत्री जी के निर्णायक नेतृत्व में तेज गति से विकास के पथ पर आगे बढ़ रहा है।

Message from the BJYM President Shri Tejasvi Surya

Namaskar!

As we mark the completion of nine exceptional years under the esteemed leadership of Prime Minister Narendra Modi, I am humbled to share my thoughts on this historic occasion.

T

he Modi Government's tenure has been a testament to the unwavering spirit of a resurgent India, demonstrating the transformative power of decisive leadership, progressive policies, and dedicated service to the nation.

In the past nine years, the government's vision of 'Sabka Saath, Sabka Vikas, Sabka Vishwas' has been a guiding light, fostering an inclusive and progressive India. Initiatives like Pradhan Mantri Jan-Dhan Yojana have brought financial services to every corner of the nation, empowering millions with the security of formal banking. The Swachh Bharat Abhiyan has revolutionised sanitation practices, furthering our national commitment to public health and dignity.

PM Modi's vision of a Digital India has given an unprecedented boost to our technology infrastructure. Our country has made enormous strides in the adoption of digital technology, with initiatives like digital literacy programs and a cashless economy drive impacting both urban and rural landscapes. We stand proud today as a country firmly grounded in the digital age, a testament to the Modi government's forward-looking policies.

The flagship 'Make in India' initiative has catapulted our nation onto the global manufacturing stage, bringing in much-needed foreign investment and creating countless job opportunities. Infrastructure projects like Bharatmala and Sagarmala have bolstered our physical infrastructure and rejuvenated our nation's economic landscape.

The government's commitment to social justice is unwavering. With the abrogation of Article 370 and the passing of the Triple Talaq Bill, the Modi government has

set a precedent in upholding the rights of every citizen, regardless of their socio-cultural background.

Undeniably, the Covid-19 crisis was a testing time for us all. However, the Modi government's determined response and the mammoth vaccination drive, the largest in the world, demonstrate our capacity to turn challenges into opportunities for growth and resilience.

As a Member of Parliament, I have witnessed first-hand the transformative changes brought by the Modi government. This steadfast dedication to the nation and its citizens motivates us, the young leaders, to strive for an even brighter future for our country.

However, we are aware that the path to a prosperous India is not without challenges. But under PM Modi's dynamic leadership, we remain resilient and committed to making India a global leader in all facets.

As we forge ahead, let us remember that every citizen contributes to the tapestry of our nation. Our combined efforts have the power to write the next chapter of our collective journey. With this, I urge you to join us in the continued endeavour of nation-building, inspired by the Modi government's dedication to a robust, prosperous, and inclusive India.

Here's to many more years of progress and prosperity under the visionary leadership of PM Modi.

Tejasvi Surya

National President
Bharatiya Janata Yuva Morcha

Editorial

As Prime Minister Narendra Modi's administration completes nine years, it is an opportune moment to reflect on its enduring legacy. The Modi government, since 2014, has been the embodiment of transformative leadership, firmly anchoring India in an epoch of significant growth, development, and strategic decision-making.

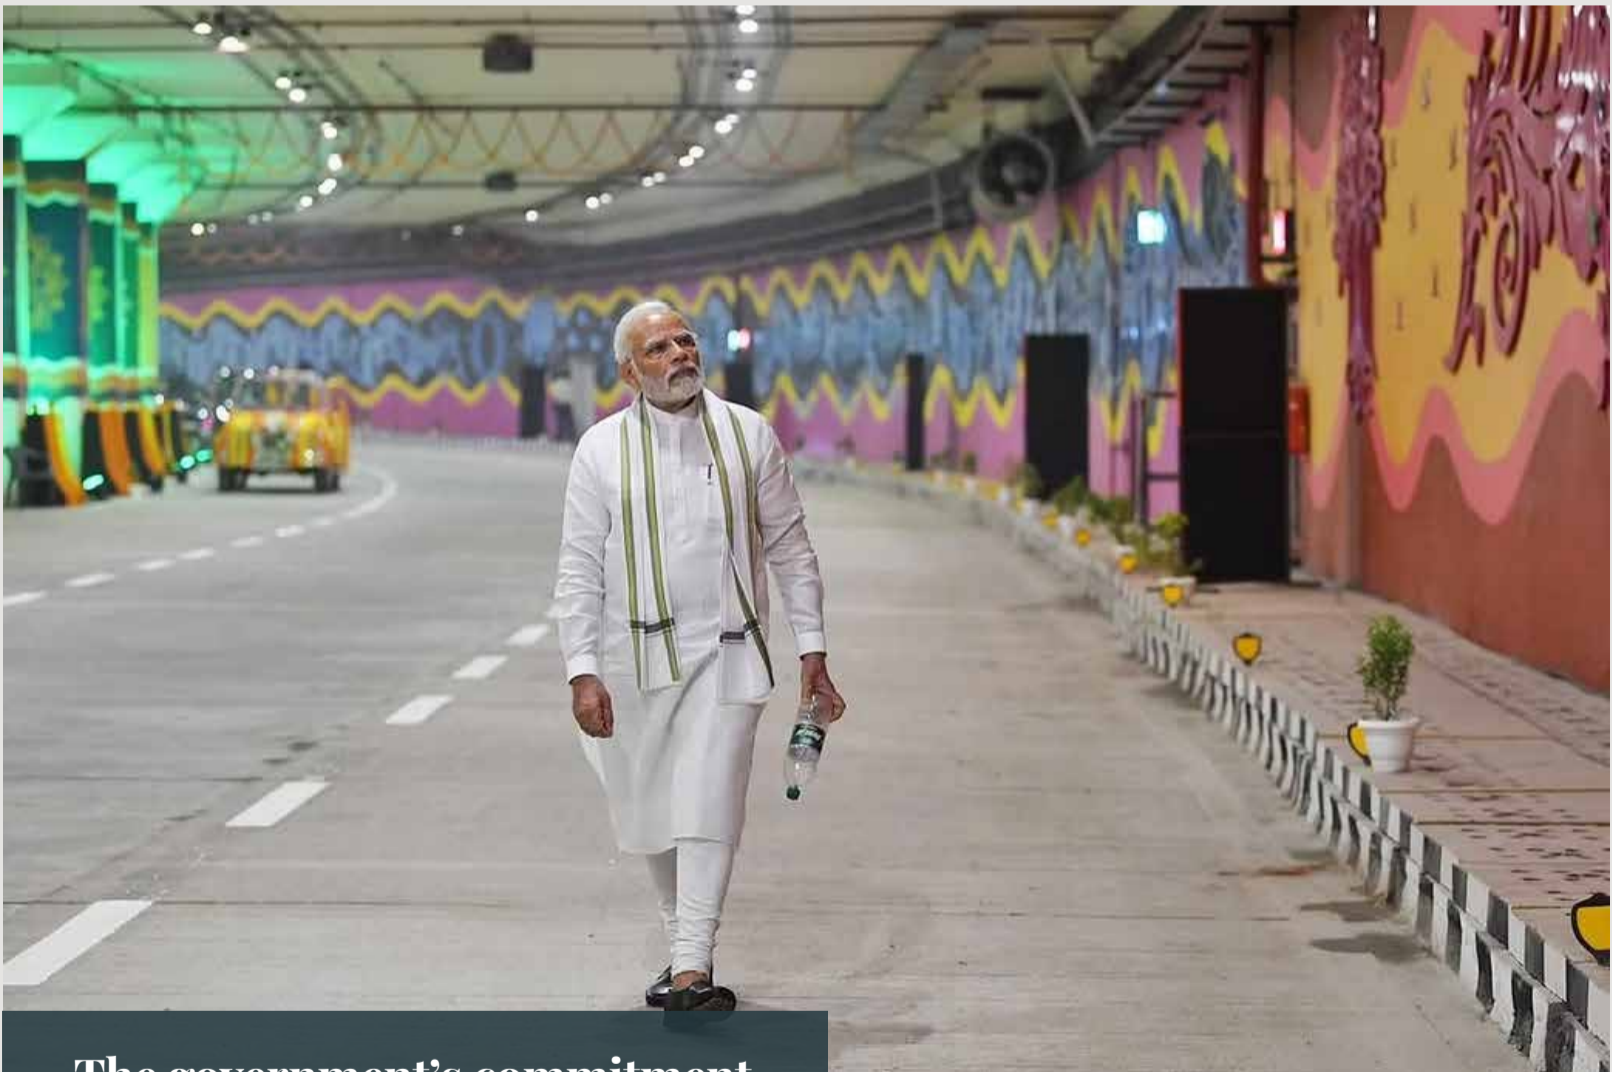

The first attribute to note is the government's unwavering dedication to economic development. The 'Make in India' initiative was a game-changer, boosting domestic manufacturing and bolstering India's global presence. Today, India is a prominent destination for foreign direct investment, with numerous international corporations establishing manufacturing units in the country, driving job creation and economic growth.

Furthermore, the Modi government has taken determined strides towards financial inclusion, a prime

example being the Pradhan Mantri Jan-Dhan Yojana. This initiative revolutionized the banking sector, bringing millions of Indians into the formal banking system, thereby fostering economic empowerment and financial independence.

One cannot ignore the government's emphasis on cleanliness and sanitation. The Swachh Bharat Abhiyan has spurred a nationwide movement towards sanitation and hygiene. The success of this mission, underlined by the construction of millions of toilets and the eradication of open defecation in several areas, reflects the commitment towards the health and dignity of every Indian.

Infrastructure development has been another significant pillar of the Modi administration. The government's commitment to building next-generation infrastructure 'from airports to highways and smart cities' has been exemplary. The Bharatmala and Sagarmala projects are pivotal examples of the government's vision to

The government's commitment to building next-generation infrastructure 'from airports to highways and smart cities' has been exemplary.

create a robust and comprehensive infrastructure framework.

Furthermore, the digital revolution under the Modi government, through initiatives like Digital India, has played a critical role in propelling India towards a technologically advanced future. Whether it's digital

literacy, e-governance, or the push towards a cashless economy, the government's focus on leveraging technology has been transformative.

Prime Minister Modi's leadership has also strengthened India's foreign relations. With his charismatic diplomacy, he has succeeded in elevating India's global stature. His approach has ensured that India today is an influential player in global decision-making forums.

The government's response to crises has been praiseworthy. The handling of the Covid-19 pandemic, the nationwide lockdown, and the subsequent vaccination drive underscore the government's ability to take bold, necessary decisions in the face of adversity.

Innovation in governance has been a hallmark of the Modi administration. From a direct benefit transfer system that mitigates corruption to the PM-Kisan scheme providing income support to farmers, there has been a shift towards effective and transparent governance.

Finally, the government's commitment to social justice and empowerment deserves praise. Be it the abrogation of Article 370 for the integration of Jammu and Kashmir or the Triple Talaq Bill upholding the rights of Muslim women, the administration has shown the courage to undertake necessary reforms for a more equitable society.

However, this is not to suggest that the journey has been devoid of challenges. The administration has faced criticism and resistance. Yet, in the face of adversity, the government has shown resilience and a commitment to its vision of a prosperous and inclusive India.

Nine years of the Modi government mark a significant era of bold reforms, unprecedented development, and a renewed sense of national pride. As the journey continues, it is hoped that the government will stay true to its principles of Sabka Saath, Sabka Vikas, Sabka Vishwas and steer India towards greater heights.

Antyodaya

(Serving the poor,
honouring the
marginalized)

Under the Swachh Bharat Mission

Gramin, all the villages have
declared themselves to be
Open Defecation Free by
2nd October 2019.

Har Ghar Jal

(Jal Jeevan Mission)

Benefitted more than
**8 crore rural households with
more than 40 Crore people.**

Saubhagya Yojana

3 CRORE

Households were electrified i.e.
covering over approximately
99.9% households.

Over **200+ Crore**

doses of COVID-19 vaccines were
delivered in 18 months, making it one of
the biggest and affordable immunisation
campaigns across the world.

Pradhan Mantri Bhartiya

Janaushadi Kendra having
thousands of outlets has provided
quality generic medicine across
the country.

The Pradhan Mantri Gram Sadak Yojana has enhanced

rural connectivity and offers
all-weather roads while utilizing
green technology at relatively
lower constructions costs

Healthcare made more accessible with 23+ Crore families covered under health insurance.

Pradhan Mantri Shram Yogi Mann-Dhann Yojana

provides a monthly pension of Rs.3000/- after reaching 60 years.

Over 11 Crore farmers have benefitted from the Pradhan Mantri Kisan Samman Nidhi

which provides farmers with an assured Direct Benefit Transfer cash transfer of **Rs. 60,000/-year** and **23 Crore+** have been issued Soil Health Cards to ensure that they were aware of the type of soil and its specific requirements.

Bharatiya Prakratik Krishi Padhati (BPKP)

Bharatiya Prakratik Krishi Padhati (BPKP) was launched by the government to promote sustainable natural farming systems.

PM Fasal Bima Yojana

PM Fasal Bima Yojana is the biggest security cover for farmers – for every Rs.100 of premium paid by farmers, Rs.517 was paid in claims.

The Budget Allocation for Agriculture

The Budget Allocation for Agriculture – has increased 4.5 times and there is more than a 300% increase over the past 9 years of the Modi Government from **Rs.30,224 Crores in 2013-14 to Rs.1,31,612 Crores** in 2023-24.

76 Lakh Hectares have been covered under Per Drop More Crop (Drip Irrigation) since 2015.

India has witnessed a tremendous increase in of **115%** in the export of processed foods.

India ranks first in milk production in the world at **221.06 MT**, with an increase of **51% over 9 years**. It ranks second in rice & wheat production and is the largest black tea producer in the world.

7350% increase in pulses procurement at MSP.

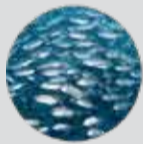

4.60 Lakh Seed Villages have been created and over **102 MT** seeds have been produced, which ensures both availability and

315MT+ Food grains produced during 2021-2022 despite the COVID Pandemic.

7,000+ Agri and allied Startups have been recognised for agriculture which has boosted innovation and increased employment opportunities for the youth.

The focus on allied sectors since 2014 has resulted in the **Blue Revolution in India** & it has become the second largest fish-producing nation in the world.

Rs.40,600 Crores+ has been paid to farmers to 10% Ethanol Blending of Fuels, which subsequently helped in increasing the income of farmers.

Kisan Credit Cards – have saved over 3.89 Crore farmers from debtors by providing safe institutional credit.

National Agriculture Platform (e-NAM) – has been set up to ensure farmers are able to digitally sell their produce for a fair price and ensure transparency and equity. The platform has registered more than **1.74 Crore** Farmers and has recorded trade worth **Rs.2.33 Lakh Crore.**

Over 70% PMAY homes are owned solely or jointly by Women thus making them the core of prosperity & progress.

47% of the total DPIIT recognized startups have at least one woman director empowering and enabling entrepreneurs.

Over 70% of MUDRA Loans (PMMY) and 80% of Stand-Up India loans were sanctioned for women entrepreneurs thereby making them empowered job creators. 27.7 Crore collateral free loans have been extended to women entrepreneurs under the PMMY initiative & **Rs.33,152.43 Crore has been sanctioned to women entrepreneurs under the Stand-Up India Scheme.**

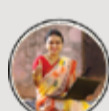

5 Crore+ Sukanya Samridhhi Accounts with Rs.1.75 Lakh Crore in savings have transformed the mindset wherein the girl child is perceived as Lakshmi.

Janaushadhi Suvridha – More than 34,71 Crore Sanitary pads were sold at Rs.1/- ensuring 'Swachhta, Swasthya and Suvridha' for India's underprivileged women.

28 Lakh+ women owned MSMEs are not merely centred on entrepreneurship but also job creation (2023). And, over 2 Lakh women owned MSMEs are registered on UDYAM Portal.

PM Gramin Digital Saksharta Abhiya (PGMDISHA) 54% women have been certified under this initiative thereby ensuring that women in rural areas are empowering in utilizing technology to their benefit.

Pradhan Mantri Surakshit Matritva Abhiyan (PMSMA) provides all pregnant women with a full service suit and more than 3.94 Crore+ pregnant women have been examined.

POSHAN Abhiyan – was initiated to improve the nutritional status of children, adolescent girls, pregnant women and lactating mothers. There are 9.9 Crore+ beneficiaries of the scheme.

Janani Suraksha Yojana (JSY) ensures safe and secure delivery for expecting mothers. The institutional delivery has increased from 87% to 95% in 9 years.

Empowering India's Amrit Peedhi

6.24 Crore Jobs have been created through the digital economy between 2014-19

5.93 Crore people have been trained under the PGMDISHA initiative (March 2023)

A total of **23 IITs, 20 IIMs and 390** new universities have been established

More than **30 Lakh ST students** have received scholarships annually under the Pre-Matric & Post-Matric Scholarship Scheme.

1.21 Crore people have benefitted under the PM Rojgar Pratsahan Yojana

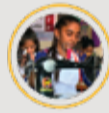

14,500 Schools are to be upgraded and developed under the Pradhan Mantri Schools for Rising India Yojana.

13.5 Lakh+ people have been trained under the DDU-GKY initiative.

More than **30,000 girls** pursued higher education in STEM under the Vigyan Jyoti Programme as the Indian Youth is emerging as innovators and positive disruptors.

The Skill India mission has helped in transforming the energy of over 2.8 Crore youth into the power of skilling them for future roles

733 Khelo India Centres have been sanctioned across the country and 2,759 athletes have been covered for training and financial support by the Government.

1,957 Skill Hubs Initiative (SHI) have been established in schools across the country in the last 2 years, at the rate of around 80 SHIs per month.

The Youth is shifting from job-seekers to job-creators – more than **9 lakh direct jobs** have been created through StartUp India.

The number of medical colleges has increased by a stunning 70% from 387 in 2014 to 660 in 2023 with the number of AIIMS increasing from 7 to 22.

The number of Higher Secondary Schools have increased by **56,100+ in the last 9 years** at around 520 schools per month.

273 new medical colleges have opened in the last 9 years at the rate of more than 2.5 medical colleges per month.

10,000 Atal Tinkering Labs (ATLs) have been set up since 2016 at the rate of over 110 Labs per month. More than 75 Lakh students are actively engaged in the ATLs.

The National Education Policy has been implemented after nearly 4 decades.

EASE OF LIVING

for India's Middle Class
